Fitting

Installation

1. Untie the string ties, unclip the metal clips and unroll the gate.
2. Insert the end post of the gate next to existing net end post. Tie the posts together.
3. At the other end (where the gate is to open and close), insert the support post into the dock and tie post to existing net. Stake dock into place.
4. Insert docking post into dock, lift latch up and slide over top of support post.
5. Make electrical connections.

Use
