

Fits onto our 3" or 4" welded wire panels at any height desired. Bottle rack shown with our Lamb 'N' Kid feeding bottle.

Bottle Rack Item #563200

Before attaching your bottle rack—
Make sure the vertical rods of the panel are facing the inside of the pen, otherwise the bottle holder is difficult to hang on the panel.

1. Attach the fixed hooks (**on the outside of the pen**) at the desired feeding height (about teat height on a ewe).
2. Connect the hinged hooks two rods above where the fixed hooks are hanging.
3. Place bottle, teat end down, into the bottle holder.
