

Permanent Fence

32 in. High-Tensile Woven Wire with High-Tensile upper wires and offset "hot" wires

To install

1. Set the end/corner/curve brace assemblies.
2. Stretch a GreenCote® barbed wire at soil level to use as a "straight-edge" for installing line posts.
3. Power-drive or hand-set the line posts. Attach barbed wire to posts.
4. Unroll the woven wire. Strain it from end post to end post with strainer clamps. Staple woven wire to the posts.
5. Strain and attach 2 HT smooth wires above the woven wire.
6. Insulate, strain and attach offset wires.
7. Install a cut-out switch at an end post to allow turning off the power from the lower wire when animals are not in the field.
8. Connect all insulated wires to the energizer or cut-out switch.
9. Connect all noninsulated wires (and the woven wire) to a ground rod.
