

# Fault Finder Remote Control Handset

## Introduction

The Fault Finder Remote Control Handset has three functions:

- Voltmeter - provides instant feedback on fence performance (voltage and current)
- Fault finder - assists in the location of faults anywhere on the fence system
- Remote control - allows you to switch a remote controlled energizer on or off from anywhere on the fence system.

## Models covered by this manual

This manual covers various handset models - Fault Finder Remote Control / Fence Compass Remote Control / Tracker Remote Control.

## Parts of the handset
