#540355

1. Slide clamp beneath lip of solar panel.
2. Thread bolts through bracket into clamp. Tighten. Clamp should put pressure on the lip, holding it in place. Attach bracket to roof, wall or pole in direct sunlight.
3. Connect panel's cable to power pack. Connect solar lights to power pack. Let charge 6-8 hours before use.
4. Activate powerpack (red toggle).
5. Activate switches on light cables as needed.
