

# Shock-Or-Not®

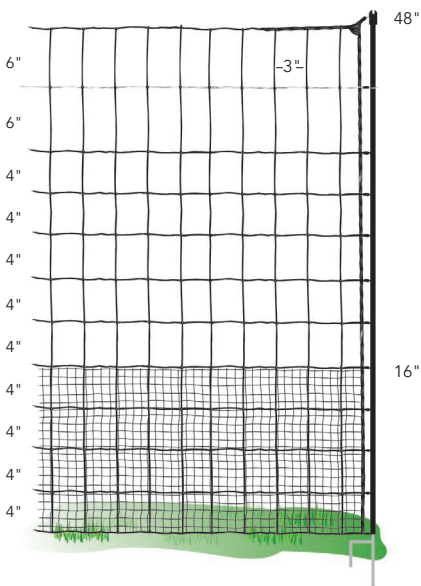

To view on our website – Click on the links & video below.

## To purchase Shock-Or-Not

1. Measure the fence line.
2. Choose the length and the amount of netting needed.  
**Example:** A 200 ft fence requires two rolls of 100 ft net.
3. Choose either:
  - a. **Netting Kits**—includes netting and support posts. Energizers and accessories sold separately.
  - b. **Netting Only**—energizers and accessories sold separately.

Electric Netting Installation Video

## When to electrify

It's important to electrify the fence in areas where predators are a nuisance, or if your birds will be unsupervised for long periods of time. Without a proper deterrence, animals will not learn to respect the fence and, unfortunately, will test it. You will need a fence energizer to electrify the net.

## When not to electrify

Some folks prefer to watch their birds during the day and take them in at night. They can use a non-energized fence. If your flock is not under constant supervision, then we strongly advise that you electrify the fence. Non-electrified netting will not stop predators.

## Netting Kit

### Shock-Or-Not Kit

#### Includes:

- 100 ft roll of Netting
- 4 FiberTuff Posts

100' x 48" (DS, black) .....#209011
