

# GOAT TROUGH

Item #HF9BLACK

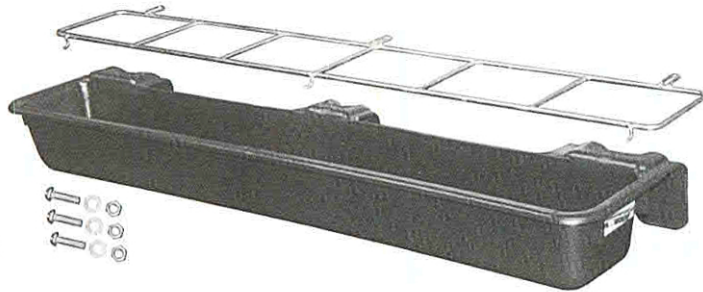

## Component Parts:

### Hardware Package

- (3) machine screws
- (3) washers
- (3) nuts
- (1) metal grate
- (1) goat trough

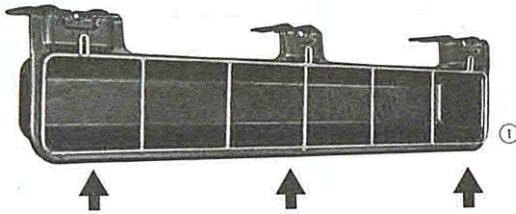

### Hand Tools Needed

- flat-head screwdriver
- scissors

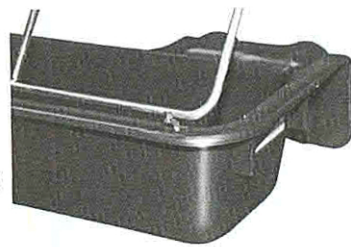

## Assembly & Installation Instructions:

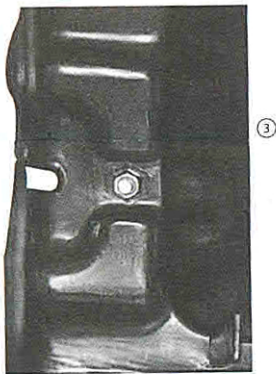

1. Remove ties and place grate on trough to align with holes.

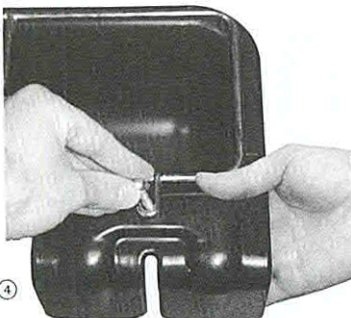

2. Hook metal grate onto trough.

3. Turn trough over and place (1) nut in inset on bottom side of hook.

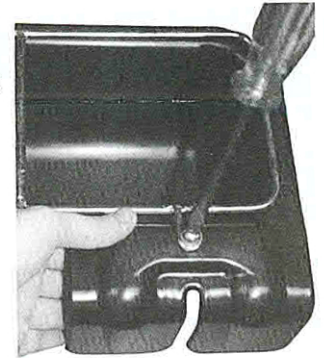

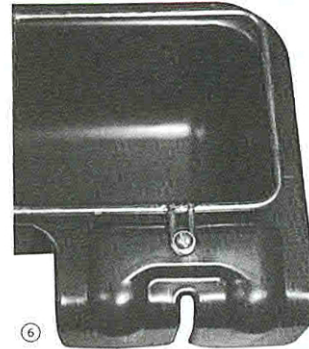

4. Hold nut in place, turn trough over, and insert bolt and washer through grate

## Assembly & Installation Instructions:

5. Using the flat-head screwdriver, tighten bolt to nut to secure grid.

6. Repeat steps 3 through 5 for the other two holes.

Your goat trough is now assembled.

## 3 Universal Mounting Abilities

1. Will securely hang on 2x (4 or 6)
2. Secure as in #3 but insert 2x4 behind feeder to level out feeder for increased feed storage volume. \* Great in creep pens or when feeding a large group at one time
3. Will securely hang on cattle, hog, or combination panel alone secured by placing the slot in the 3 hooks with the vertical stays on the panels. \* Great for limited volume in the show pens or as an individual feeder
