LYNDONVILLE, VT 05851

NET WEIGHT 10 OUNCES

VERMONT'S ORIGINAL

**BAG BALM®**

For chapped conditions and superficial abrasions.

After each milking, apply thoroughly and allow coating to remain on surface. This protective ointment helps to keep superficial tissue moist and soft. In case of deep puncture wounds seek medical help. Discontinue use if rash or irritation occurs. Keep this, and all medications, away from children.

SINCE 1899

# BAG BALM®

Since 1899, **BAG BALM** has been the farmer's friend helping keep dairy cows from becoming chapped from the harsh Vermont environment. It's like having another hand on

the farm or a helper around the house. **BAG BALM** works hard all year round – and works well. There's nothing like the original, and that's what you get when you buy this familiar green can.

NET WEIGHT 10 OUNCES

**SPECIAL DIRECTIONS**

**BAG BALM** contains lanolin and stays on to provide moisturizing and softening. For pets, apply **BAG BALM** liberally to the affected area. For use on cows, thoroughly wash treated teats and udder with separate towels before each milking. To avoid contamination after each milking, bathe the udder with plenty of hot water, strip milk out and dry skin. Apply **BAG BALM** freely and massage gently with this proven ointment twice daily. This product contains no alcohol.
