

Cal "62" Plus Gel

This treatment applies to the following species:

- [Dairy Cattle](#)

Manufacturer: Aspen

A nutritional supplement containing calcium, magnesium, and cobalt for dairy cattle during calving.

Each tube contains 537 mg/mL (384 mg/gm) of a unique base of calcium chloride and calcium carbonate.

Directions For Use:

Give one tube prior to or after calving and second tube 12 to 24 hours after calving. Hold head of the cow in a slightly elevated position. Place nozzle near rear of mouth. Use of hook nozzle is recommended. Discharge entire contents of tube. Hold head up and allow animal time to swallow.

GUARANTEED ANALYSIS PER TUBE/DOSE
