

Handy Feeders

1. Push optional legs into the base of the feeder to attach.
2. Insert top crossbeam (non threaded) into the feeder cone.
3. Bottom crossbeam (threaded) fits into top crossbeam and inserts into remaining holes in the cone.
4. Thread wingnut onto handle. Rounded wings of wingnut should face the top of the handle.
5. Thread handle through the cross beam into base of feeder. Hand tighten.
6. Turn cone to adjust feed height. When desired height is reached, tighten wingnut into the crossbeam to "lock" the cone.
7. Fill feeder and place the lid onto the cone.
8. If using rain hat, remove lid.

#540037 - with grill
#540038 - rain hat
