

# Solar Shed Light Instructions

[www.premier1supplies.com](http://www.premier1supplies.com) • 800-282-6631 • Washington, IA

#540355

1. Slide small piece of clamp beneath back lip of solar panel.
2. Thread bolts through bracket into clamp. Tighten. Clamp should put pressure on the lip, holding it in place. Attach bracket to roof, wall or pole in direct sunlight.
3. Connect panel's cable to power pack. Connect solar lights to power pack. Let charge 6-8 hours before use.
4. Activate powerpack.
5. Activate switches on light cables as needed.
