Thermostatically Controlled Outlet

Automatically turns power on and off
according to outside air temperature.

Save electricity when using
with the following items:

- ◆ Heat Tape
- ◆ Heat Lamps
- ◆ Tank De-Icers
- ◆ Engine Heaters

ON AT
35° F
2° C

Model TC-3

OFF AT
45° F
7° C

120VAC/15A

Avoid Cold Weather Catastrophes!

Thermo Cube is a device which, when plugged into a standard 120V AC electrical outlet, will automatically turn power on and off to any device plugged into it. This **Thermo Cube** will automatically turn on power when air temperature reaches approximately 35°F (2°C) and will turn off the power when the temperature exceeds approximately 45°F (7°C).

The **Thermo Cube** can be used with several different devices to help save electricity and wear and tear on your equipment. We recommend the following devices to be used with the **Thermo Cube** - Self Regulating Heat Tape, Heat Lamps, Stock Tank Heaters, Pond De-Icers, and Engine Block Heaters.

Use the Model TC-3 **Thermo Cube** as a "Freeze Warning Device" by connecting it to a lamp that is visible to a neighbor. The **Thermo Cube** will illuminate the lamp if the furnace fails and the temperature in the house or cabin falls below 35°F (2°C).

Maximum rating: 1800 Watts, 15 Amps, 120V AC. To be used with GFCI outlets. **MADE IN U.S.A.**
