

**UMBIREZ™** is a next generation navel barrier solution for livestock. It can be used for dipping or spraying, rapidly cleansing and drying the site. The patent-protected technology forms a natural barrier for durable protection against bacterial ingress that then biodegrades after use.

**INSTRUCTIONS FOR USE:**

Holding the animal securely, submerge the whole navel into the dip cup, or spray liberally over the navel region, ensuring the liquid fully covers the navel. Spray directly onto ear tag site. Tags can also be dipped or sprayed. Apply with care near the face as the product is an irritant to eyes. Rotate the nozzle to obtain the optimum spray. Use within 6 months of opening.

**Precautions:** For external use only. Keep out of the reach of children. For animal use only. Wear gloves and eye protection and preferably long sleeves. In the event of skin contact, wash off with soap and water. If in contact with the eyes, rinse immediately with copious amounts of water. If not easily removed or if eye irritation is observed, seek medical attention.

**DANGER**

**STORAGE INSTRUCTIONS:**

Store below 77°F and away from direct sunlight.

**DISPOSAL:**

Do not reuse container; rinse thoroughly with water and recycle.

Highly flammable liquid and vapour (contains ethanol). Keep away from any heat, hot surfaces, sparks, open flames and other ignition sources. Keep containers tightly closed and store them at room temperature in a well ventilated area. Do not refrigerate.
