IMPORTANT WARRANTY INFORMATION PLEASE READ FILL OUT AND RETURN ENCLOSED WARRANTY CARD

THIS WARRANTY COVERS: LEM 1152 & 1153 Digital Countertop Dehydrator. THE WARRANTY IS EXTENDED TO THE ORIGINAL PURCHASER ONLY.

WARRANTY DURATION: This product is warranted to the original purchaser for a period of one (1) year from the original purchase date. EACH UNIT COMES WITH A WARRANTY CARD, WHICH MUST BE FILLED OUT COMPLETELY AND RETURNED IMMEDIATELY, WITH A COPY OF THE PURCHASING RECEIPT. FAILURE TO RETURN YOUR WARRANTY CARD WILL LIMIT WARRANTY TO 90 DAYS WITH PROOF OF PURCHASE.

WARRANTY COVERAGE: This product is warranted against defective materials or workmanship. The warranty is void if the product has been damaged by accident, misuse, neglect, modification or improper service or repairs by unauthorized personnel. It is also void if damaged in shipment or by other causes not arising out of defects in the materials or workmanship. This warranty does not extend to any units which have been in violation of written instructions furnished. This warranty covers only the product and its specific parts, not food or other products processed in it.

WARRANTY DISCLAIMERS: This warranty is in lieu of all warranties expressed or implied, and no representative or person is authorized to assume any other liability in connection with the sale of our products. There shall be no claims for defects or failure of performance under any theory of sort, contract or commercial law including, but not limited to negligence, gross negligence, strict liability or breach of contract. The manufacturer declines all responsibility for damage to persons, things or animals arising from the failure to comply with the norms contained in this manual. The manufacturer reserves the right to make modifications at anytime to the models while maintaining the main characteristics described herein. The manufacturer also declines all responsibility for any errors in compiling this manual.

WARRANTY PERFORMANCE: During the above one year warranty period, a product with a defect will either be repaired or replaced after the product has been inspected by an LEM Service Technician. LEM RESERVES THE RIGHT TO REFUSE WARRANTY PERFORMANCE OR PRODUCT EVALUATION UNLESS THE ORIGINAL SALES RECEIPT OR THE WARRANTY CARD IS ON FILE. The repaired product will be in warranty for the balance of the one year warranty period. No charge will be made for such repair or replacement.

IMPORTANT NOTICE: If any parts are missing or defective, please contact our Customer Service Department for assistance at 877-536-7763. (M-F 8:30am to 4:30pm EST) **DO NOT RETURN TO THE STORE WHERE THE PRODUCT WAS PURCHASED.**

LEM PRODUCTS MERCHANDISE RETURN POLICY WARRANTY SERVICE:

To obtain service under terms of this warranty, please contact us at 877-536-7763 to obtain authorization prior to returning the merchandise. No merchandise will be accepted without prior authorization. Please return the product pre-paid in the original packaging if possible, enclose a copy of your receipt, (Keep a copy of your proof-of purchase for your records.) and include a written explanation of the issue. Ship to LEM Products, 4440 Muhlhauser Rd., Suite 300, West Chester, OH 45011. LEM Products is not responsible for damage incurred in shipping, make certain to pack product properly. Return shipping charges are the responsibility of the purchaser. Packages returned to LEM should be insured for the value of the product to cover any damages that may occur during shipping.

Revised March 19, 2015

DIGITAL TIMER DEHYDRATOR

USE & MAINTENANCE

1152, 1153

Cuts, injuries and/or fire may result from non-compliance with all operating procedures described within this instruction manual.

GENERAL WARNINGS AND SAFETY INFORMATION

1. Read all instructions.

- 2. Always ensure that the appliance is properly assembled and safely set up before use.
- 3. **DO NOT** block air vents. Keep appliance an appropriate distance away from walls, curtains or other objects to allow for proper air circulation. **DO NOT** use your dehydrator in confined spaces.
- 4. DO NOT use near combustibles or aerosol cans. Do not place on or near a hot gas or electric burner, or in a heated oven.
- 5. **DO NOT** attempt to dehydrate any liquids, very fine powder that will turn into dust, glass or metal. Never pour liquids into the appliance.
- 6. DO NOT operate the appliance on flammable surfaces such as carpeting and wood floors.
- 7. DO NOT place on top of or underneath any other appliance.
- 8. **DO NOT** leave the appliance unattended if it can be switched on and operated.
- 9. It is **IMPORTANT** to monitor the appliance while in use. **NEVER** leave the appliance unattended.
- 10. **CAUTION:** Close supervision is necessary when any appliance is used by or near children or persons with certain disabilities. Set up and store the appliance out of reach of children. When not in use, store device in a secure and dry place out of reach of children.
- 11. The appliance must be connected to an 120V AC electric supply only.
- 12. For your safety, this unit is equiped with a 3-pronged, grounding plug and must be plugged into a properly grounded outlet. If your outlet is not of the proper type, it is your responsibility to have the outlet and wiring changed to the correct type. Do not cut off the third (grounding) prong. Do not use an adapter.
- 13. Do not operate with a damaged cord or plug, after the unit malfunctions, has been damaged in any way or if appliance has been immersed in water or other liquid. Return unit to LEM Products for assessment and repair.
- 14. Unplug from outlet when not in use and before cleaning. Allow to cool before putting on or taking off parts.
- 15. First plug cord into the wall outlet then turn control to "ON". To disconnect, turn control to "off", then remove plug from wall outlet.
- 16. DO NOT let cord hang over edge of table or counter, contact sharp edges or touch hot surfaces.
- 17. Indoor use only. To protect against the risk of electrical shock, never immerse the device in water/liquid and do not expose the device to rain or moisture. **WARNING:** In the event the device should fall into water, remove the plug from the wall socket before attempting to remove the unit from the water. If submergence occurs, have the appliance examined by an authorized technician before use.
- 18. To protect against the risk of electrical shock, **DO NOT** use the appliance if your hands are wet or if you are standing on a wet floor. **DO NOT** use the appliance if it is wet or moist. **DO NOT** operate this device with wet hands or bare feet. **DO NOT** operate near running water.
- 19. The appliance is designed exclusively for domestic use and not for commercial purposes.
- 20. Use the appliance with the supplied accessories only. **WARNING:** Do not use appliance for other than intended use. The use of attachments/accessories not recommended or sold by the manufacturer may cause injury, damage to personal property, and may void your warranty.
- 21. WARNING: DO NOT use while under the influence of alcohol or drugs (prescription or non-prescription) as these may impair user's ability to properly assemble or safely operate the appliance.
- 22. Use appliance on a level, stable surface to prevent tipping. Never move the appliance while unit is in use.
- 23. Do not touch hot surfaces. Use handles or knobs. Some surfaces may become very hot during use! Serious injury may result! **DO NOT** move the dehydrator while hot. Allow the appliance to cool before handling.
- 24. Allow drippings in drip tray to cool prior to removing. Contents in drip tray may be hot.
- 25. **NEVER** put your fingers or other foreign objects such as spoons, knives or any other kitchen utensils into the air vents while in operation. It may cause physical harm such as a burn, electric shock or even a fire.
- 26. The manufacturer declines any responsibility in the case of improper use of this product. Improper use of this product voids the warranty.

MAKING JERKY

Meat being used for jerky should be as lean as possible. Using lean meat will help the meat dry faster. Ground meat should be 79%–90% lean. Ground turkey, venison, buffalo and elk are other excellent choices for jerky. Jerky seasonings are available for all tastes (available at lemproducts.com). Whenever jerky is being made, cure (available at lemproducts.com) should be used. Cure is used to help prevent botulism during drying at low temperatures. Follow the manufactures directions on the cure packet. Marinate meats in the refrigerator. Do not leave meats unrefrigerated. Always wash hands thoroughly with soap and water prior to and after working with meat products.

Special consideration must be made when using venison or other wild game, as it can become heavily contaminated during field dressing. Venison is often held at temperatures that could potentially allow bacteria to grow, such as when it is being transported. Refer to the USDA Meat and Poultry Department for further information on meat and food safety.

When using a dehydrator, check the temperature of the dehydrator with a dial thermometer (available at lemproducts.com) before drying jerky. The minimum recommended temperature for drying meats is 145° F. **IMPORTANT:** Before you place the meat in a dehydrator, it is highly recommended by the USDA to heat the meat to 160° F (poultry to 165° F) **BEFORE** the dehydrating process. This step assures that any bacteria present will be destroyed by heat. After heating to 160° F, maintaining a constant dehydrator temperature of 130-140° F during the drying process is important because: 1) the process must be fast enough to dry food before it spoils; and 2) it must remove enough water so the microorganisms are unable to grow. For more information go to www.usda.gov.

If you are using a marinade, shake off excess liquid before placing the meat in evenly spaced single layers approximately 4'' apart on the racks. Dry meat at 145-150° F for 3-5 hours. You may need to blot fat droplets from the surface of the meat occasionally, using a paper towel. Drying times may vary based on many circumstances, including but not limited to: the relative humidity of the room, the temperature of the meat at the beginning of the drying process, the amount of meat in the dehydrator, leanness of meat, etc.

REHYDRATING FRUITS/VEGETABLES

FRUITS: To rehydrate dried fruit, cover with boiling water and let sit for 5 minutes, drain.

VEGETABLES: Vegetables should rehydrate to almost the same size as they were when fresh. Cover vegetables in cold water and allow food to soak for 30 minutes to 2 hours. It is not necessary to rehydrate prior to using in soups and stews.

STORING DRIED FOODS

- 1. Vacuum sealing is ideal for keeping dried foods.
- 2. Store in portion sizes which will be easily used at one time.
- 3. Store in a cool, dark, dry place.
- 4. Store in air tight, moisture resistant containers.

Cuts, injuries and/or fire may result from non-compliance with all operating procedures described within this instruction manual.

() <u>CAUTION</u> ()

BEWARE! HANDLE CAREFULLY! SOME SURFACES MAY BECOME VERY HOT DURING USE! Serious injury may result! DO NOT move the dehydrator while hot, allow the appliance to cool before handling.

OPERATING INSTRUCTIONS

IT IS IMPORTANT TO READ & UNDERSTAND ALL OF THE INSTRUCTIONS

Make sure power switch is turned off. Place the unit on a clean, dry surface away from children and pets. Plug into an undamaged, grounded electrical outlet.

- 1. Follow your recipe for the food that you wish to dehydrate then place the food evenly on the shelves provided. You can use cooking spray to help prevent sticking. **DO NOT** allow food pieces to touch or overlap.
- 2. Place shelves into the dehydrator.
- 3. Close the door or door(s).
- 4. Turn the temperature knob to the desired temperature.
- 5. Turn on the dehydrator and the LED control board will show "00:00".
- 6. Press button "HRS" to set the hour time, hour increases by 1 each time, and the LED will blink. The maximum hour time is 30.
- 7. Press button **"MIN"** to set the minute time, minutes increase by 5 each time, and the LED will blink. The maximum minute time is 55.
- 8. Press "START", fan will run and unit will begin to heat.
- 9. The timing shown on the LED board will countdown and the machine will shut off automatically when time has elapsed.
- 10. If it is necessary to stop the unit before time has elapsed simply push the **"START"** button and the dehydrator will shut off. If drying appears to be uneven you may want to rotate shelves 180° or up or down. Use oven mitts, shelves may be hot.
- 11. If you would like to resume the dehydrating process simply push the "START" button again and the dehydrator will resume heating and time will continue to countdown.
- 12. When dehydrating is complete, use oven mitts to open the door. Slide shelves out and remove finished product.
- 13. Set power switch to the "OFF" position and disconnect the electrical cord from outlet.
- 14. Allow dehydrator to cool completely prior to clean up.
- 15. Wipe with a clean damp cloth. **DO NOT** immerse the dehydrator in water.

16. Wash dehydrator trays and drip tray with warm soapy water. Rinse and hand dry.

CLEANING

BEFORE CLEANING OR SERVICING THE DEHYDRATOR, UNPLUG UNIT FROM POWER SOURCE. Prior to first use and after each use:

- Allow dehydrator to cool completely before cleaning.
- Remove the shelves and drip tray from the dehydrator and wash in warm soapy water.
- Wipe the door, interior and exterior of the dehydrator with a moist sponge or soft cloth. **DO NOT** use scouring pads or abrasive cleaners. Be careful to not splash water onto the heating element or other electrical parts in the rear of the dehydrator. **NEVER** immerse the dehydrator cabinet in water or other liquid.
- Allow dehydrator to dry completely prior to storage.
- Keep in a cool dry place.

REVIEWING THE DEHYDRATION PROCESS

TO OBTAIN THE BEST RESULTS:

- 1. Choose high quality foods. Do not use foods with bruises or blemishes.
- 2. Wash food, use clean utensils and keep your area clean.
- 3. Pre-treat foods to prevent discoloration.
- 4. Always use lean meats. Remove as much fat as possible prior to dehydrating.
- 5. Do not overlap foods. Air must circulate. Lay foods flat and spaced on the dehydrating trays.
- 6. If uneven drying is noticed, rotate shelves 180° or up or down.
- 7. Check dryness every 2 hours until crisp, pliable or leathery depending on the product. Cut item in half and check internal dryness. If food is still moist, dehydrate longer.
- 8. Use the food drying guide as a reference for proper temperature. Drying food at higher temperatures may cause food to harden. Food may be dry on the outside but the inside may still be moist.
- 9. Cool food before testing for dryness.
- 10. Proper storage is essential to maintain the quality of the food. Food should be at room temperature prior to storing. Vacuum sealing is ideal for keeping dried foods.
- 11. Choose foods that are similar size and shape for uniform drying time.
- 12. Dry foods at appropriate temperatures. Check the food drying guide in this booklet. Check foods often for dryness. Blanch vegetables prior to dehydrating. Blanching destroys enzymes that make vegetables deteriorate, keeps them from browing and from developing off flavors.

TROUBLESHOOTING

ISSUE: Food is sticking to the trays.

RESOLUTION: After first hour turn food over.

RESOLUTION: Prior to putting food on trays, spray or coat trays lightly with vegetable oil.

- **ISSUE:** Mold is on dehydrated food.
 - CAUSE: Food was not allowed to cool prior to storage. Food was not dried completely. Storage container was not air-tight. Food was not uniform in size which caused uneven drying. Food was dried at too high a temperature. Exterior was dried and hardened, but interior was still moist.
 - **RESOLUTION:** Test several pieces of food for dryness. Cut food and check internal dryness. Allow food to cool prior to storage. Dab fat droplets from jerky with paper towels or napkins.
- **ISSUE:** Storage container has moisture build up.
 - **CAUSE:** Food was not allowed to cool prior to storage. Food was not dried completely.
 - **RESOLUTION:** Test several pieces of food for dryness. Cut food and check internal dryness. Dab fat droplets from jerky with paper towels or napkins.
- **ISSUE:** Fruits/Vegetables are discolored or have brown spots.
 - CAUSE: Food was not pretreated. Food was dried at too high of a temperature. Food is over dry.
 - **RESOLUTION:** Pretreat cut fruits with lemon, lime or pineapple juice and water at a 1:4 ratio. Lemon/lime soda or a product called "Fruit Fresh" can also be used.
- ISSUE: Unit powered OFF or will not power ON / Unit displays **00:00** before set time is up. **RESOLUTION:** Unit needs to be serviced call LEM Products at 877-536-7763 for assistance.
