Feed at least 28 days during periods of exposure or when experience indicates that coccidiosis is likely to be a hazard.

**ACTIVE DRUG INGREDIENT**
Decoquinate.................................................. 18.16 g/ton

**GUARANTEED ANALYSIS**
Crude Protein, min ........................................... 24.00%
Crude Fat, min ............................................. 30.00%
Crude Fiber, max ........................................... 0.15%
Ash, max ................................................... 6.50%
Calcium, min ................................................ 0.95%
Calcium, max ............................................. 1.45%
Phosphorus, min ........................................... 0.80%
Selenium (added), max ................................ 0.3 ppm
Vitamin A, min ............................................. 30,000 IU/lb
Vitamin D₃, min ........................................... 5,500 IU/lb
Vitamin E, min ............................................. 150 IU/lb

**INGREDIENTS**
Dried Skimmed Milk, Dried Whey Protein Concentrate, Sodium Propionate, Citric Acid, Calcium Propionate (Preservatives), Dried Whey Product, Dried Milk Protein, Dried Whey, Dried Bovine Colostrum, Animal and Vegetable Fat (preserved with BHA and BHT), Dextrose, Lecithin, L-Lysine Monohydrochloride, Extracted Citric Acid Presscake, DL-Methionine, Vitamin A Acetate, Vitamin D₃ Supplement, Vitamin E Supplement, Ascorbic Acid, Choline Chloride, Vitamin B₁₂ Supplement, Menadione Sodium Bisulfite Complex (Source of Vitamin K Activity), Niacin Supplement, Calcium Pantothenate, Pyridoxine Hydrochloride, Riboflavin Supplement, Folic Acid, Thiamine Mononitrate, Biotin, Ethylenediamine Dihydriodide, Calcium Carbonate, Dicalcium Phosphate, Magnesium Sulfate, Cobalt Sulfate, Ferrous Sulfate, Selenium Yeast, Brewer’s Dried Yeast, Manganese Sulfate, Zinc Sulfate, Manganese Methionine Complex, Iron Amino Acid Complex, Zinc Methionine Complex, Mono and Diglycerides of Edible Fats or Oils, Natural and Artificial Flavors.

**MANAGEMENT TIPS:**
1. Provide all lambs and goat kids with colostrum milk during the first 24 hours to provide concentrated nutrients and passive immunity to disease. Provide 10% of animal’s bodyweight split into 3 or 4 feedings.
2. Mix and feed according to package instructions and the chart above.
3. Feed regularly and in sufficient quantity.
4. Wash bottle thoroughly after each use.
5. Provide fresh water at all times.
6. Keep lambs and goat kids in a well-ventilated, draft free area to avoid sudden temperature changes with supplemental heat if needed.
7. A good quality grain mix and water should be offered free-choice after lambs or goat kids reach about one week of age.
8. Good quality roughage should be offered free-choice when lambs or goat kids reach about 3 weeks of age.
9. Lambs can be weaned when doubled their birthweight or are consuming 0.5 pounds of dry feed per head per day. Goat kids can be weaned at 2.5 times their birthweight.
10. It is recommended that orphan lambs and goat kids be vaccinated weekly for 3–4 weeks with a Clostridium perfringens type CD&T Toxoid.

**Manufactured for**

Premier 1 Supplies
2031 300th St, Washington, IA 52353
