   - If you get this product in your eyes, wash it off with cool water immediately for 15 to 20 minutes.

4. **Storage and disposal:**
   - Store this product in a cool, dry place.
   - Do not mix this product with any other chemical.

5. **Transport:**
   - Do not transport this product with any other chemical.

6. **Disposal:**
   - Do not dispose of this product in the regular trash.
   - Disposal should be done in accordance with local and federal regulations.

**PRODUCT INFORMATION**

- **Net Weight:** 15 lbs (6.8 kg)
- **INGREDIENTS:**
  - 35% Duddingtonia flagrans spp., a fungus found in soil and pasture that has been combined with BioWorma
  - **LABELING STATEMENTS:**
    - **Purpose and Use:**
      - This product is a biological control for the free-living stages of the parasitic nematode, preventing their development.
    - **Precautions:**
      - Store in a cool, dry place.
      - Do not mix with any other chemical.
      - Do not transport with any other chemical.
    - **Restrictions:**
      - Do not use in meat-producing animals.
      - Do not use in horses, cattle, sheep, or goats.

**USES:**

This product is intended for the control of parasitic nematodes in grazing animals.

**FEEDING INSTRUCTIONS:**

- **Dosage and Administration:**
  - Mixers/loaders and applicators must wear a NIOSH-approved particulate mask, respirator, protective clothing, and protective eyewear.
  - Mixers/loaders and applicators must wear a NIOSH-approved particulate mask, respirator, protective clothing, and protective eyewear.
  - Mixers/loaders and applicators must wear a NIOSH-approved particulate mask, respirator, protective clothing, and protective eyewear.

- **Application Rate:**
  - 1.6 oz per 100 lbs bodyweight, up to 1200 lbs bodyweight. Do not exceed 1200 lbs bodyweight.

- **Application Method:**
  - Thoroughly mix the required amount of this product into the feed.
  - Do not dilute this product.

**APPLICATION GUIDELINES:**

- **Application Time:**
  - Application should be made after grazing animals have been treated with an anthelmintic.
  - Application should be made after grazing animals have been treated with an anthelmintic.
  - Application should be made after grazing animals have been treated with an anthelmintic.

- ** Pretreatment:**
  - All grazing animals should be pretreated with an anthelmintic before application.
  - All grazing animals should be pretreated with an anthelmintic before application.
  - All grazing animals should be pretreated with an anthelmintic before application.

**TREATMENT:**

- **Observations:**
  - Animals should be observed for signs of improvement.
  - Animals should be observed for signs of improvement.
  - Animals should be observed for signs of improvement.

**STORAGE AND DISPOSAL:**

- **Storage:**
  - Store in a cool, dry place.
  - Store in a cool, dry place.
